

Timothy Gona — Software Engineer

Resume

Full-Stack Development | AI & Data Engineering Specialist

Contact Information

Name: Timothy Gona

Location: Nairobi, Kenya

Phone: +254 708 443 570

Email: gonatimothy2@gmail.com

Professional Summary

Versatile Software Engineering student and certified technologist specializing in the intersection of Full-Stack Development, AI, and Data Engineering. Proven track record in implementing advanced AI solutions like Retrieval-Augmented Generation (RAG) and Oracle Vector Search, complemented by a robust understanding of end-to-end data pipelines. Certified across multiple domains by Oracle, Cisco, and DataTalks.Club, with a focus on building scalable, data-driven applications that bridge the gap between technical infrastructure and intuitive user experience.

Key Strengths

- **End-to-End Architect:** Expertly navigating the full lifecycle from Infrastructure as Code (Terraform) and Data Warehousing to responsive UI implementation.
- **AI & Vector Integration:** Specialist in enhancing LLM reliability through RAG pipelines and high-performance vector database management.
- **Data Pipeline Engineer:** Proficient in workflow orchestration, batch/stream processing, and analytics engineering.
- **Visual Communicator:** Leveraging strong graphic design skills (Adobe Creative Suite) to create intuitive user interfaces and professional stakeholder reports.

Technical Skills

Domain	Skills & Tools
Data Engineering	Docker, Terraform (IaC), Google Cloud Platform (GCP), Mage, Airflow, dbt (data build tool), Apache Spark, Kafka, BigQuery
AI & Machine Learning	Oracle Vector Search, Retrieval-Augmented Generation (RAG), Vector Embeddings, Similarity Search, Model Evaluation, Neural Networks
Full-Stack Development	JavaScript (Node.js, Express.js), Dart, PHP, HTML5, CSS3, Software Testing, Startup Development
Database Management	Oracle DBMS, PostgreSQL, SQL Express, Vector Database Management, Schema Design
Design & Tools	Adobe Illustrator, Adobe Photoshop, Canva, Postman API, GitHub, Infogram

Certifications

- **Data Engineering Professional** | DataTalks.Club (Zoomcamp)
- *Key Skills:* Docker, Terraform, GCP, Mage, BigQuery, dbt, Spark, Kafka
- **Oracle AI Vector Search Certified Professional** | Oracle
- *Credential ID:* OC7508702 (Oct 2025 – Oct 2027)
- *Key Skills:* RAG, Vector indexes, Vector embedding, Similarity search
- **AI & Machine Learning Specialist** | KyU Computer Society
- *Key Skills:* Model Evaluation, Supervised/Unsupervised Learning, Python for ML
- **Data Science Essentials with Python** | Cisco
- *Key Skills:* Data Cleaning, Visualization, Statistical Analysis, Python Programming
- **Software Development Certification** | Power Learn Project (PLP)
- *Focus Areas:* Full-Stack Development, Dart, Web Development, Software Testing

Selected Projects

- **End-to-End Data Engineering Pipeline | Data Infrastructure**
- Architected a containerized pipeline using Docker and Terraform to automate infrastructure provisioning on GCP.

- Implemented workflow orchestration to manage data ingestion into BigQuery and used dbt for production-grade data modeling.
- **AI-Powered Data Analysis System | AI & Integration**
- Developed a RAG pipeline to enhance AI response accuracy using Oracle Vector Search for efficient similarity matching.
- Created interactive business intelligence dashboards using Matplotlib and Pandas.
- **E-Commerce Platform & Brand Identity | Full-Stack Development**
- Engineered a responsive platform using a modern JavaScript stack and secure RESTful APIs.
- Designed all visual brand assets and marketing banners using Adobe Creative Suite.

Education & Memberships

- **Bachelor of Science in Software Engineering**, Kirinyaga University
- *Expected Graduation:* August 2028
- **Member & Certified** KyU Computer Society
- **Software Development Program**, Power Learn Project (PLP)
- *Completed:* 2025

Languages

- **English:** Professional Working Proficiency
- **Swahili:** Native/Bilingual Proficiency
